

# Alexander Mcneilly

847-650-5488 | [mcneilly@mit.edu](mailto:mcneilly@mit.edu) | [Website](#) | [LinkedIn](#) | [GitHub](#)

## EDUCATION

### Massachusetts Institute of Technology (MIT)

Cambridge, MA

*B.S. in Computer Science and Engineering, B.S. in Mathematics, Minor in Design*

*Sep 2022 – Dec 2025*

**Courses:** Algorithm Analysis, Software Construction, Computer Architecture, Low-level Programming, Linear Algebra

**Activities:** MIT Informatics Tournament, MIT Reality Hack, VR/AR @ MIT, CodeForces, TEDxBoston

## SKILLS

**Languages:** TypeScript, Python, C++, C#, Swift, GraphQL, SQL, Go, HTML/CSS/JavaScript

**Tools:** Git, ThreeJS, WebGL, OpenGL, React, MongoDB, MySQL, AWS, REST APIs, Figma, Bezi, some WebRTC

## EXPERIENCE

### Aura Intelligence — Incoming Software Engineer Intern

*Feb 2024 – May 2024*

- Incoming spring software engineering intern for adaptive LLM startup, working with TS, React, Python, Three.js

### MIT Media Lab — Incoming Software Engineer

*Feb 2024 – Present*

- Develop AI-powered interaction features for augmented reality smart glasses platform

### MIT Informatics Tournament — Organizer (Software, Infrastructure, Branding)

*Sep 2023 – Present*

- Designed website and branding to support 1,250+ contestants and secure \$15,000+ in sponsorships
- Created sponsorship materials and garnered support from top firms like Citadel, Jane Street, and Hudson River Trading

### Jane Street — Software Engineering IN FOCUS Participant

*Jan 2024*

- Developed high frequency ETF trading bot in Python for electronic trading competition
- Applied functional programming knowledge in OCaml to build multiplayer snake game

### MIT EECS — Teaching Lab Assistant (Intro to Programming and Data Science)

*Sep 2023 – Dec 2023*

- Enhanced 100+ students' programming skills with 50+ hours of personalized debugging assistance and code reviews
- Developed solutions and implemented test cases for two problem sets in a class of 300+ students

### MIT Pokerbots — Software Engineer

*Jan 2023 – Feb 2023*

- Co-developed poker bot in Python (redesigned and optimized in C++) for MIT's 2023 pokerbot competition
- Recognized by DRW Holdings for best risk to reward algorithm; Placed top 20 out of 200 Teams

### Hack Ridge — Software Engineer, President (2022)

*Nov 2019 – Aug 2022*

- Organized two 24-hour annual hackathons to host over 400 students, securing over \$6,000 in sponsorship
- Engineered a color blob detection Android app in Java/OpenCV; Launched mental health social studying app using Java

## PROJECTS

### Splocks: Code 3D Easily On The Web [Ongoing] | *TypeScript, Node, React, ThreeJS, GraphQL, AWS*

- Designing block functions and hierarchy for browser-based 3D block coding language; Launching in mid February

### Memva: Canva Clone For Making Memes [Ongoing] | *TypeScript, Node, Express, React, MongoDB, HTML, CSS*

- Crafting Canva-like meme designer to learn how to build browser-based design tools

### PixelLab: TypeScript-Based WebGL Engine [Ongoing] | *TypeScript, React, WebGL, C#*

- Building web game engine with WebGL to explore web-based engine construction

### NoteLab: Collaborative Post-It Whiteboards | *TypeScript, React, SQL, ConvexDB, Clerk*

- Developed Miro-style collaborative web app to learn multiplayer networking and synchronous data mutation

### Intuition: Notion Clone For Course Management | *TypeScript, React, SQL, CSS, ConvexDB*

- Built Notion-style doc tool for course management; enhanced personal learning with system design principles

### SpriteChest: 2D Game Engine | *C, C++, OpenGL, SDL*

- Develop C-based 2D game engine using OpenGL, SDL to learn engine creation

### Hygge: Augmented Reality Interactive Painting | *JavaScript, React, ThreeJS, Processing (p5.js), Python, TensorFlow*

- Utilized Processing, ThreeJS, and PoseNet pose detection to track user motion and paint strokes

### Bezi Guide (bezi.wiki) | *TypeScript, React, AWS*

- Designed and deployed documentation and resource website for my favorite design tool
